

Calculating Grade Point Average:

1. For each graded (non-pass/fail) course the student completes, with the exception of **Physical Education** for the weighted GPA, multiply the numeric equivalent of the grade received times the number of credits earned to determine the number of quality points awarded.
2. Determine the sum of quality points earned for all courses each year.
3. Divide the quality point total for one year by the total number of credits attempted for that year.
4. Use this same method for calculating both the WGPA and the GPA.

Grade	Weighted	Unweighted
A	5	4
B	4	3
C	3	2
D	2	1
F	0	0

Course:	Final Grade:	Level Weight for the course:	X	Final Credit(s)	=	Quality PTS.
---------	--------------	------------------------------	---	-----------------	---	--------------

Example:

French I	A	4 (unweighted class)	X	5.00	=	20
