

# Math Night Brings PACK Families Together

Village School's first ever Math Night was held on March 7 and was a huge success!

More than 500 students and parents participated in a variety of fun, hands-on, and innovative activities to provide families the opportunity to experience math the way our students do each day.

Student-leaders did a fantastic job leading the stations and communicating how those activities help to develop mathematical thinking and conceptual understanding.

We can't wait for next year!
